

XM Radio has benefited me and others in many ways. One BIG benefit is the weather channels. They tell us the weather in our local town and oter citys. For ex. When i was going to New York i wanted to know how the weather was there. I was in my truck and had no other way of geting the weather there, so i just turned to the New York weather channel on XM Radio. People pay for these things plus we get 100% commerical free radio. PLEASE REJECT NAB'S PETITION 04-160. I bet if yall listened to XM Radio yall would reject this petition. AND OPPOSE HR 4026!!!!!!!!!!

Thank you for

your time

Ryan
